Shade variation

This wall tile collection uses the triangle as the base element of a meticulous, infinitely modular style.

The colours create sophisticated graphic patterns, with both powerful contrasts and delicate shifts in tone.

The gloss glaze of the surface and its soft and fluid structure, collects and reflects light and slivers of colour.

The surface structure, colours and side lengths can all be combined with the FRAME collection.

Laying instructions

Lying instructions for tiles with colour variation:

It is recommended to take tiles from several boxes at a time to ensure proper shade variation that enhances the variability and randomness of the finished surface.
