# Style and contemporary eternal elegance

All Saints Marble is the stoneware collection that translates the elegance of the rarest, most classical varieties of marble into design of contemporary beauty.

Achieved through the painstaking selection of raw materials and exclusive technologies, All Saints Marble reinterprets thirteen marble varieties of amazing beauty, offering them in different surfaces, a vast range of combinations and infinite architectural possibilities.

# Symbols

	Glossy flooring		The 60x60 and 30x60 rectified sizes can be used in modular combinations if laid with 2 mm joint
	Matt flooring		Slight variation - V2: clearly distinguishable differences in texture and pattern within the same production run • Variation
	Glossy wall tiling		Moderate variation - V3: significant variation in texture, pattern and colour from tile to tile within the same production run. The colour range should be viewed before selecting the material
	Matt wall tiling		For collections with V2 and V3 shade variation, tiles should be taken from more than one box at a time to guarantee a greater variety and alternation of colouring and patterns, for a more natural effect.
	Frost proof		
	Deep abrasion resistance		
	Slip resistance. Flooring of work environments and operating areas with slippery surfaces		Tiles suitable for any room of a house without direct access from the outside or access not protected by doormats. Average stress abrasive wear.
	Mean coefficient of friction D.M. N°236 14/6/89		Materials suitable for rooms subject to medium-heavy abrasion, such as detached houses and light-traffic commercial buildings.
	Slip resistance ENV 12633 - BOE N°74 DEL 2006		Materials suitable for situations of relatively hard abrasion in environments without protection against scratching, both public and private.
	Slip resistance. The PTVs stated in the catalogue are determined using slider 96. Reference standard • BSEN 13036-4:2011		Some skirting tiles are not frost-proof, we recommend indoor applications only.
	Slip resistance Reference standard • ANSI 137.1:2012		Each symbol is merely indicative and must be referred to the specific relevant standard.
			For the installation of frost-resistant products we recommend the creation of "joints", or laying joints, of a suitable dimension for the dimensional tolerance of the tiles and for the type of use required. The execution of holes and precision cuts on tiles in porcelain stoneware must be made using specific equipment.

## CCC Certification

French QB UPEC certification provides the user with a quality guarantee: it confirms that the products delivered, marked with the QB and UPEC logos, comply with the prerequisites of the NF EN 14411 standard in accordance with the current certification rules and that they have the performance characteristics specified in the CSTB (Centre Scientifique et Technique du Bâtiment - Scientific and Technical Centre for Building) "Technical Specifications for the UPEC Classification of Ceramic Floor Coverings".

The four letters refer to:  
 U: resistance to foot traffic wear  
 P: mechanical resistance to the shifting of movable and fixed objects  
 E: resistance to water  
 C: resistance to commonly used chemicals

Suitability of ceramic tiles for installation on pedestals.

The full, up-to-date list of certified products can be viewed at [www.cstb.fr](http://www.cstb.fr).

GREENGUARD GOLD Certification ensures that a product has met some of the world's most rigorous and comprehensive standards for low emissions of volatile organic compounds (VOCs) into indoor air. For further information: <http://spot.ulprospector.com>

These products have been sourced with regard to their environmental impact throughout their life cycle, from extraction and processing of the raw materials through to the recycling of demolition spoil. The findings of this LCA (Life Cycle Assessment), performed in accordance with the ISO 14040 series international standards, have been published in the Environmental Product Declaration (ISO 14025 and EN 15804), contributing to the attainment of LEED certification credits.
